

SBM Clinical Trials Units - Commack

- Easily accessible strategic location for community outreach
- Contemporary and inspirational space for patient interaction
- Accommodates patients across the life span: children to older adults, and those with disabilities

The Art of Healing

Creativity flourishes at the intersection of **art and medicine**.

The art showcased was created by medical students and physicians of the *Renaissance School of Medicine*.

We dedicate this artwork to our patients and their families who, by enrolling in clinical trials, enable us to heal disease through innovation.

CPET CARDIOPULMONARY EXERCISE TESTING

The Trackmaster® TMX428 heavy-duty, medical treadmill is specifically designed to be interfaced with and controlled by a wide variety of Cardiac and Pulmonary Stress Testing Systems. Made in America since 1983, Trackmaster® is manufactured under a Quality Management System registered to ISO 13485 and complies with worldwide regulatory requirements. Tens of thousands are in daily use.

With more user-preferred features than other stress testing treadmills, the Trackmaster® has a proven and dependable design including:

- Smooth, quiet, zero-start, 4 HP (6 HP peak) hi-torque drive.
- Smooth, quiet linear actuator elevation system.
- Low-to-the floor, cushioned deck for patient comfort and safety.
- 22"x 63" (56 cm x 160 cm) running belt and safety handrails.
- Patented MasterTrack® belt alignment system eliminates off-center running belts.
- Exceptionally accurate, self-calibrating speed and elevation.
- Prominent emergency stop button and patient safety tether.
- Minimum maintenance.

TMX428

The easy to locate and easy to use emergency stop button can be installed on left or right treadmill handrails.

For additional safety, a tether worn on the patient's wrist stops the treadmill when pulled.
